

Sea Salt, Fine

INCI: Sodium Chloride

Natural Sourcing's Sea Salt (Fine) is a fine screened white salt, crystallized by natural evaporation of Pacific Ocean sea water from the San Francisco Bay. The crystallized salt is refined by washing with clean brine to remove surface impurities and dried. As a natural evaporite however, it may still contain occasional inclusions of extraneous matter from the crystal growing environment which show up as black or light specks. It contains no anti-caking or free-flowing additives or conditioners. This product contains no known allergens and exhibits virtually no microbiological activity.

Applications: Natural Sourcing's Sea Salt (Fine) is suitable for direct use in food and personal care products.
