

BOLIVIAN PINK SALT

Available Fine and Coarse Grain Sizes

Suitable for beauty and personal care applications.

INCI: Sodium Chloride (Bolivian Pink Salt)

Shelf Life: Stable (Keep Away From Moisture)

Background:

Bolivian Pink Salt has a beautiful rosy-pink, speckled hue. In addition to its sodium chloride (salt) content, Bolivian Pink Salt is remarkably rich in other minerals including Calcium, Potassium, Magnesium, Iron and an array of other essential and trace minerals, making it a highly nourishing and functional ingredient for bathing, exfoliation oral and other personal care applications.

Bolivian Pink Salt is a crystal rock salt harvested from ancient rock salt beds discovered under the Andes Mountain region of Bolivia. After a volcano erupted ages ago, these salt beds were covered in volcanic lava. Over time, the lava solidified and became volcanic rock. It is said that the volcanic rock protected the bed of Bolivian Pink Salt from pollution, impurities and also fortified the salt with an array of minerals.

The salts are harvested by hand using a time consuming process. After these ancient salts are crushed and gathered by hand, the salts then undergo a natural process to remove any residual impurities. Then, they are carefully dried and then ground into either a very fine or a coarse grain size. The salts are carefully stored so that the salts retain their purity, freshness and their natural balance of minerals.

Bolivian Pink Salt Properties:

- Revitalizes and Helps Balance the Skin
- Soothes Problematic Skin
- Naturally Exfoliating
- Leaves Skin Looking Smoother
- Supports Healthy Muscles

Bolivian Pink Salt is Perfectly Suited for the Following Applications:

- Skin Care
- Oral Care
- Aromatherapy
- General Wellness

Bolivian Pink Salt Mineral Content:

- Sodium
- Calcium
- Iron
- Potassium
- Magnesium
- Other Essential and Trace Minerals

Bolivian Pink Salt contains up to 8 times more iron, and up to 5 times more calcium and potassium than sea salt. Bolivian Pink Salt also contains a trace amount of magnesium, an important mineral not found in traditional sea salt.

Uses:

Bolivian Pink Salt helps balance the skin, makes it look and feel smoother and has the potential to help soothe problematic skin conditions. Bolivian Pink Salt's mineral composition is superior to sea salt for use in bath salts and other personal care products intended to support healthy muscles, promote relaxation and encourage flexibility. Bolivian Pink Salt is an ideal choice for body exfoliating products as the salts also help balance the skin and helps to remove dirt and impurities.

Grain Sizes:

Fine - Suited for bath soaks, exfoliating body care products and mouth/dental rinses.

Coarse - Ideally suited for bath salt and bath soak formulations. Coarse salts can also be added to bar soaps to give a unique, beautiful and exfoliating texture to the bars.

Standard Packaging:

Available in 280 kg (20 x 14kg bags) quantities.
