ORGANIC BEESWAX (NOP Certified)

Suitable for cosmeceutical applications.

INCI Nomenclature: Beeswax

Shelf Life: Stable

Background:

Organic beeswax is a natural secretion of honey bees who feed from organic botanicals that are treated in accordance with organic regulations. Our organic beeswax is filtered to remove any impurities and then is extruded into noodles for easy use. Our NOP certified organic beeswax has a mild, sweet, honey-like aroma. The color may vary from light to medium brown.

Properties:

- Humectant
- Emollient
- Emulsifying Agent
- Lends Rigidity to Cosmetics and Soaps
- Optimal Choice for Aromatherapy Grade and Natural Candles

Cosmeceutical Uses:

Include our organic wax in organic creams, lotions, balms, body butters and other organic formulations where rigidity or body are required. It lends emollient, softening properties to your products and works as a humectant. Beeswax can also act as a co-emulsifier in emulsions. When added to soap, beeswax lends hardness and resistance to melting. In candle making, pure organic beeswax candles are better for the environment than paraffin candles, and organic beeswax should be considered when making aromatherapy grade candles.

Standard Packaging:

Organic Beeswax is available in 25 lb boxes and 1 MT pallets.
