SANGRE DE DRAGO (DRAGON'S BLOOD) LIQUID RESIN (Wildcrafted)

Suitable for cosmeceutical applications.

INCI: Croton Lechleri (Sangre de Drago) Resin

Extraction: Refined Sapped Resin

Shelf Life: 1-2 Years

Country of Origin: Amazon

Background:

Sangre de Drago Liquid Resin, also known as Dragon's Blood, is extracted from medium/large tropical trees that thrive within the Amazonian regions of South America. When the trunk of the tree is cut or wounded, it exudes a dark, red, resinous sap that resembles blood. The curative powers of the thick resin and tree bark are well known by indigenous tribes of Mexico, Peru and Ecuador. They painted the sap onto their skin to help stop bleeding, protect wounds, and promote healing. The antiseptic sap dries quickly, forming a seal over wounded skin, preventing infection and allowing the skin to heal. In tribal medicine, the Sangre De Drago sap was used both externally and well as internally, to heal wounds, stomach ulcers, throat infections, mouth ulcers, skin afflictions and insect bites. The sap is also believed to be useful as an anti-herpes agent. These ethnomedical applications of the sap have been confirmed by both in-vitro and in-vivo studies.

The wound healing abilities of Sangre De Drago Resin are attributed to its active constituents: proanthocyanadins (antioxidants), a lignan called dimethylcedrusine, and an alkaloid called taspine. Taspine has been shown to have anti-inflammatory, anti-sarcomic, anti-viral, anti-tumor and cicatrizing properties. Studies have also shown that Sangre de Drago resin can help contract a wound, form a crust at the wound site, assist in the formation of collagen and regenerate skin cells.

This unique combination of anti-inflammatory, antiseptic and cicatrizing properties make the resin an exceptional ingredient in formulations intended for healing skin abrasions, wounds, burns, eczema and rashes.

Our wildcrafted Sangre De Drago Resin is provided in its natural fluid state. It has been gently refined to remove impurities. Sangre De Drago possesses a spicy yet sweet vanilla-like aroma that intensifies when heated. The resin can be heated to convert the fluid into a solid suitable for grinding into a fine powder. It is soluble in water or alcohol.

Natural Sourcing provides the highest quality wildcrafted Sangre de Drago Liquid Resin available. It is carefully sourced and packaged to maintain the purity, freshness and beneficial properties of this highly nutritive and aromatic fluid resin.

Sangre De Drago Resin Properties:

- Antiseptic
- Anti-viral
- Anti-herpes
- Anti-inflammatory
- Anti-tumor
- Anti-sarcomic
- Rich in Proanthocyanadins (antioxidants)
- Outstanding Source of Taspine (alkaloid)
- Contracts and Seals Wounds
- Cicatrizing
- Promotes Collagen Formation
- Assists in Skin Regeneration
- Prevents Infection

Sangre de Drago Resin is a highly recommended ingredient in products for:

- Cracked, Damaged Skin
- Wounds and Burns
- Acne
- Eczema, Psoriasis and Other Skin Conditions

Standard Packaging:

Sangre de Drago Liquid Resin is available in 25 kg pails.
