

NATURAL SOURCING

Specialists in Cosmeceutical Ingredients

Bee Products

Natural Sourcing's range of bee products includes cosmetic grade beeswax, honey powder and royal jelly extract. Bee products tend to demonstrate active antimicrobial properties and are naturally rich in nutritive constituents.

Organic beeswax is a natural secretion of honey bees who feed from organic botanicals that are treated in accordance with organic regulations. Our cosmetic grade yellow filtered beeswax pellets are filtered to remove any impurities and then shaped into small pellets for ease of use. Our cosmetic grade white filtered beeswax pellets are filtered and decolorized.

Further details regarding all of our superior quality bee products can be found on our Web site or by contacting us directly.
