Specialists in Cosmeceutical Ingredients

## *Muds*

Cosmetic grade muds are rich in microelements and biologically active substances that are found in the sea bed. The curative properties of muds are well known and confirmed by its long history of use. Mud application helps absorb excess oils and toxins from the skin, removes dead skin cells, unclogs pores and tones the skin. The biologically active substances found in mud facilitates mineral/toxin exchange, reduces inflammation, increases elasticity, detoxifies and nourishes the skin.

Dead Sea Mud, Fango Marine Mud and Moor Mud are amongst the most popular muds used today in well known spas across the world.

Our muds are carefully sourced, 100% pure and are ready for blending with essential oils, nutritives, extracts, hydrosols and other functional ingredients.
