

NATURAL SOURCING

Specialists in Cosmeceutical Ingredients

Preservatives

Natural Sourcing supplies a selection of Grapefruit Seed Extract, T-80 Vitamin E Oil and oil and water soluble varieties of Rosemary Oil Extract. These naturally derived ingredients will help to preserve and maintain the freshness of your formulations against bacteria, oxidation and rancidity.

It is the client's responsibility, however, to ensure that the quantity and choice of preservatives used are adequate to properly protect the formulation. Natural Sourcing recommends that all formulations be challenge tested by an independent laboratory. To request a list of labs that can perform product testing upon your formulations, please contact Natural Sourcing.
