Butters, NOP ORGANIC

Organic vegetable butter is obtained by blending the nutritive natural fatty fractions of an organic vegetable oil. Depending on the butter, the fractions come directly from either the organic oil, hydrogenated oil or the unsaponifiable fraction. Vegetable butters are solid at room temperature. The percentage of the unsaponifiable fraction of a vegetable oil is usually very low. It requires a large quantity of processed oil to yield a significant quantity of butter.

Organic vegetable butters are becoming more widely incorporated into cosmetics and skin care products as they are rich in beneficial nutrients. Butters can contribute to the viscosity and stability of emulsions, and they give rigidity to stick products and balms.

In addition to our growing selection of organic butters, Natural Sourcing supplies a large selection of superior quality conventional vegetable butters.

Standard Packaging:

25 kg, 50 kg, 100 kg, 500 kg, 1000 kg, 1 MT

Cocoa

Shea, Crushed & Refined

Nilotica Shea Butter
